

# BUSINESS INTELLIGENCE ON DEMAND Abrige® REPORTING

## GAIN ADVANTAGE: GET MORE FROM YOUR DATA

If you are like most decision-makers, you may be missing the critical business data you need to make timely decisions. Too often disconnected snapshots of data, from systems, spreadsheets...and the gut reactions at the time... are used to make decisions that can make or break competitive advantage for your business.

Smart leaders are turning to business intelligence as the first step toward that "single, timely version of the truth" they need to make the right moves.

Abrige® REPORTING brings your data together and provides user-friendly data analysis tools, alert broadcasts and rapid access to the critical data you need to improve your competitive edge.

## GAIN INSIGHT: SLICE, DICE & DRILL-DOWN

Are you getting the most from the data you collect? That ability to quickly make sense of oceans of data can be a competitive advantage, making Business Intelligence (BI) software essential for many companies. Smart leaders are looking deeper into their data to:

- ✿ Uncover profit or productivity improvement opportunities
- ✿ Create a single view of data from multiple systems, accessible from anywhere
- ✿ Slice, dice and trend to help clean data, spot anomalies, identify potential fraud, track what's hot and what's not, etc.
- ✿ Place information at the fingertips of users, rather than wait for IT to run reports
- ✿ Push alerts and reports to decision-makers in real time

## GAIN TIME: TIMELY STRATEGIC DECISIONS ARE GOOD FOR EVERY COMPANY

You do not need to run a large company to realize a quick return on your investment in BI. In fact, we find that in companies of all sizes there are manual and/or IT-dependent workarounds to getting the information needed to make performance improving decisions. Using your thinkers and do-ers as compilers is a huge waste of valuable human resources. Instead, leverage technology to do the crunching!

## THE BOTTOM LINE

Abrige® applications were architected by a management accountant/financial analyst/CEO with decades of experience in planning, analysis, reporting and decision-making....

We know how you work. We know the time savers (quick, simple reporting) and the time drainers (superfluous bells and whistles). We give you what you need to get to your data, securely and from anywhere in the World, and get the most out of it.

Abrige® offers a twist on BI that does not require the huge investment in building a data warehouse and adding multiple trained BI experts to your IT and finance staff. You can have the value of BI, with Abrige®, for much less than you expect.

There is no more powerful way to gain a competitive advantage from the data you already collect!
